To help your puppy enjoy a happy, healthy life, this preventive care visit!

Chemistry Profile and Complete Blood Count (CBC)

A blood chemistry profile, including SDMA, provides information about your puppy's kidneys, liver and pancreas as well as other functions of the body, such as blood sugar and hydration. A CBC can identify infection, inflammation and anemia. CBC test with BNP is available in the Diamond Package.

Regular Price - \$166.38
with BNP (Monitoring Heart Function) - \$275.00

Infectious Disease Screening (IDS)

This screening identifies whether your puppy has been exposed to parasitic diseases, such as tick-borne diseases, heartworm or other infectious diseases.

Regular Price - \$65.00

Fecal Test (FT)

This test checks for intestinal parasites that may live in your puppy's gastrointestinal tract. Since they are usually hidden from view, the only way to detect and identify most intestinal parasites is by doing a fecal test. Fecal test with Giardia is also available in every package.

Regular Price - \$55.00
With Giardia - \$74.00

Thyroid Function Test (TF)

A thyroid function test detects whether or not your dog's thyroid gland is functioning properly. Thyroid disease is very common in older cats and dogs.

Regular Price - \$45.00

Complete Urinalysis (CU)

This analysis assesses the overall health of your dog's urinary tract including the kidneys and bladder. It identifies infection or inflammation in the urinary tract.

Regular Price - \$65.00
